

| FEATURES                              | BENEFITS  |
|---------------------------------------|---|
| High Wear Layer Protection            | 20mil - Higher, thicker wear layer equals higher quality & longer lifespan  |
| Realistic Wood Appearance and Texture | The planks provide the visuals of real hardwood including the natural knots and scrapes with realistic wood-grain textures that can be felt at a fraction of the cost                           |
| Floor Score Certified                 | Environmentally friendly and 100% formaldehyde free   |
| Click System Technology               | The Uniclic locking system enables you to engage the flooring panels via two methods, angling and snapping  |
| Clean Protection                      | Stain and mold surface resistant  |
| High Density EVA attached pad         | Reduces noise level with excellent reflected sound reduction; Helps correct minor sub-floor imperfections and cracks  |
| Simple Maintenance                    | No specific surface treatment or wax is needed. A simple duster and damp mop on a regular basis is sufficient   |
| Life-Ready                            | Children and pet friendly against inevitable spills and scratches while precious memories are being made  |
| All Grade Level Approved              | Installation approved for all levels and all interior rooms   |
| Abrasion Resistance                   | The thicker the wear layer, the more durable your vinyl floor will be. Thickness is measured in mils, where 1 mil is equal to one thousandth of an inch, or about the thickness of a human hair |
| 100% Waterproof                       | Approved for Flood-Prone Areas  |
| Durable - High Density                | Due to its stone polymer mix, the planks have a strong rigid form, which stands up well to dents and scratches  |
| Limited Warranty                      | Covered with manufacturer's limited lifetime residential warranty and 10-year light commercial warranty   |
